## PROFESSIONAL SUMMARY

Senior Flutter Software Engineer with 7+ years of experience architecting and delivering scalable, cross-platform mobile applications. Proven expertise in Flutter/Dart, native Android (Java), and backend integration (.NET Core). Specialized in fintech, e-commerce, and GPS tracking domains, with a strong focus on real-time data processing, WebSocket communication, and performance optimization. Adept at bridging the gap between mobile frontends and robust backend architectures to deliver secure, high-performance user experiences.

## CORE COMPETENCIES

**Mobile Development**: Flutter, Dart, Native Android (Java), Kotlin (Basic), Custom UI/UX, Animations
**Architecture & State Management**: Clean Architecture, BLoC, Riverpod, GetX
**Backend & Integrations**: .NET Core Web API, Entity Framework, REST APIs, WebSockets, Firebase (Auth, Firestore, Cloud Messaging)
**DevOps & Tools**: Git, CI/CD (GitLab CI), GitHub, Play Store & App Store Deployment, Crashlytics, Google Analytics

## WORK EXPERIENCE

### Bangladesh Army
*Dhaka, Bangladesh*

*Software Engineer (Flutter)* — *Mar 2026 – Present*

- Architect and develop secure, high-performance cross-platform applications utilizing Flutter, REST APIs, WebSockets, and Firebase.
- Optimize database operations, data synchronization, and push notification systems to ensure low-latency, reliable field communications.

### Hi-Tech Bangla
*Dhaka, Bangladesh*

*Software Engineer (Flutter)* — *May 2025 – Feb 2026*

- Engineered and maintained robust cross-platform applications using Flutter and Dart, implementing scalable architectures and efficient state management.
- Collaborated directly with backend teams to integrate .NET Core services, significantly improving API response times and mobile-to-server communication.
- Delivered maintainable, high-performance applications by integrating complex APIs and ensuring seamless frontend-backend functionality.

### Developer Experience Hub
*Bangladesh*

*Software Engineer (Flutter)* — *May 2024 – Apr 2025*

- Developed and launched 5+ cross-platform applications, improving overall development efficiency and delivery speed by 30%.
- Integrated Google Maps, geofencing, and real-time GPS tracking to power location-based features and enhance user engagement.
- Implemented Firebase Authentication, Firestore, and push notifications, reducing real-time data response latency by 35%.

### Liberate Labs Bangladesh
*Chittagong, Bangladesh*

*Software Engineer (Flutter)* — *May 2023 – Apr 2024*

- Delivered 3+ Flutter applications featuring responsive UIs and reliable backend integrations.
- Managed the complete app lifecycle for Google Play Store and Apple App Store releases, successfully resolving compliance and publishing issues to ensure timely launches.

**Spinner Tech Limited** *Chittagong, Bangladesh*
*Mobile App Developer (Flutter & Android Native)* *Jan 2021 – Apr 2023*

- Built Flutter and native Android applications utilizing SQLite and Firebase for seamless online/offline data management.
- Optimized application performance and database queries, successfully reducing screen loading times by 40%.

**ChangeTechBD** *Chittagong, Bangladesh*
*Android App Developer (Java)* *Jun 2019 – Nov 2020*

- Developed native Android applications in Java, integrating e-commerce features, order tracking, and secure payment gateways.
- Enhanced application usability and user retention through targeted UI/UX improvements and performance optimization.

## TECHNICAL PROJECTS

**Pet Guardian | *Real-Time Pet Tracking*** *May 2025 – Feb 2026*

- **Technologies:** Flutter, ASP.NET Core, GPS, Geofencing
- Developed a comprehensive Flutter application for real-time pet location tracking and activity monitoring.
- Integrated GPS, geofencing, and global SIM connectivity to provide precise location updates and boundary alerts.
- Built ASP.NET Core backend services to handle live location data streams and deliver low-latency notifications.

**SK Mobile School | *Secure E-Learning App*** *May 2024 – Apr 2025*

- **Technologies:** Flutter, REST APIs, Video Streaming, Secure Authentication
- Developed a secure e-learning app enabling users to browse, enroll in, and track educational video courses.
- Implemented protected video playback to restrict screenshots, screen recording, and downloads, ensuring content security.
- Designed an intuitive user interface for seamless authentication and course access.
- View on Google Play Store

**Abedok | *Job Circular & Application Platform*** *Aug 2022 – Apr 2023*

- **Technologies:** Flutter, REST APIs, Firebase
- Built a mobile platform that intelligently filters job circulars based on user profiles and preferences.
- Implemented a streamlined, single-tap job application workflow and integrated result notifications for exam centers.
- View on Google Play Store

## PUBLICATION

**Storage Efficient Data Security Model | *IEEE R10-HTC*** *2020*

- **Focus:** Distributed Cloud Storage, Data Compression, Encryption
- Proposed a novel security model for distributed cloud storage utilizing data compression, encryption, and chunking to optimize storage efficiency while maintaining high data confidentiality.
- Authors: Arfatul Mowla Shuvo, Md. Salauddin Amin, Promila Haque
- DOI: 10.1109/R10-HTC49770.2020.9356962

## EDUCATION

**East Delta University** *Chittagong, Bangladesh*
*Bachelor of Science in Computer Science and Engineering (B.Sc. in CSE)* *Graduated Dec 2018*
