ABOUT ME

Flutter Software Engineer with 7+ years of software development experience specializing in Flutter and Dart, with additional expertise in native Android development using Java and backend development using .NET Core. Experienced in building cross-platform applications across fintech, e-commerce, and GPS tracking domains, integrating REST APIs, WebSocket communication, Firebase services, and real-time data processing. Strong focus on scalable application architecture, performance optimization, and reliable mobile solutions.

WORK EXPERIENCE

Bangladesh Army – Dhaka, Bangladesh

Software Engineer (Flutter)

[01/03/2026 – Current]

- Developed secure cross-platform applications using Flutter, REST APIs, WebSockets, and Firebase.
- Optimized performance, database operations, synchronization, and notifications.

Hi-Tech Bangla (Bangladesh) – Dhaka, Bangladesh

Software Engineer (Flutter)

[01/05/2025 – 28/02/2026]

- Developed and maintained robust cross-platform applications using Flutter and Dart, applying scalable architecture and state management solutions.
- Collaborated on .NET Core backend services, improving API performance and mobile-to-server communication.
- Integrated APIs and backend functionality to deliver maintainable, reliable, and high-performance applications.

Developer Experience Hub – Bangladesh

Software Engineer (Flutter)

[01/05/2024 – 30/04/2025]

- Developed and maintained 5+ cross-platform applications using Flutter, improving development efficiency by 30%.
- Integrated Google Maps, geofencing, and real-time GPS tracking to enhance location-based functionality and user engagement.
- Implemented Firebase Authentication, Firestore, and push notifications, reducing real-time response latency by 35%.

Liberate Labs Bangladesh – Chittagong, Bangladesh

Software Engineer (Flutter)

[15/05/2023 – 30/04/2024]

- Delivered 3+ Flutter applications with responsive UI and reliable backend integration.
- Managed Google Play Store and Apple App Store releases, resolving publishing and compliance issues.

Spinner Tech Limited – Chittagong, Bangladesh

Mobile App Developer (Flutter & Android Native)

[01/01/2021 – 30/04/2023]

- Developed Flutter and native Android applications with SQLite and Firebase for online/offline data management.
- Optimized application performance and database operations, reducing screen loading times by 40%.

ChangeTechBD – Chittagong, Bangladesh

Android App Developer (Java)

[01/06/2019 – 30/11/2020]

- Developed Android applications using Java, integrating e-commerce features, order tracking, and secure payment gateways.
- Improved application usability and user retention through UI/UX enhancements and performance improvements.

EDUCATION AND TRAINING

Bachelor of Science in Computer Science and Engineering (B.Sc in CSE)

East Delta University [12/2018]

City: Chittagong | **Country:** Bangladesh | **Website:** https://www.eastdelta.edu.bd/

SKILLS

Mobile App Development

Flutter / Java / Android SDK / Kotlin (basic) / Performance Optimization / Custom UI/UX / Animations / Firebase

Architecture & State Management

Clean Architecture / Bloc / Getx / Riverpod

Backend & Web Development

.NET Core (Web API) / Entity Framework / RESTful Services / WebSocket / Real-Time Communication

Tools & DevOps

Git / CI/CD (Gitlab CI, testing) / GitHub / Play Store & App Store Deployment / Crashlytics / Analytics

PUBLICATIONS

Storage Efficient Data Security Model for Distributed Cloud Storage Proposed a storage-efficient security model for distributed cloud storage using data compression, encryption, and data chunking to improve data confidentiality while optimizing storage efficiency.

Authors: Arfatul Mowla Shuvo; Md. Salauddin Amin; Promila Haque | **Journal Name**: 2020 IEEE 8th R10 Humanitarian Technology Conference (R10-HTC) | **Publisher**: IEEE

PROJECTS

[01/08/2022 – 23/04/2023]

Abedok — Job Circular & Application Platform Technologies: Flutter, REST APIs, Firebase

- Developed a mobile platform that filters job circulars based on users' profiles and preferences.
- Implemented streamlined job application workflows, enabling users to apply with a single tap.
- Supported the recruitment journey with exam center information and notifications when results are published.

Link: https://play.google.com/store/apps/details?id=com.abedok

[01/05/2024 – 30/04/2025]

SK Mobile School — Secure E-Learning Application Technologies: Flutter, REST APIs, Video Streaming, Secure Authentication

- Developed an e-learning application that enables users to access enrolled courses and watch educational videos securely.
- Implemented course browsing, search, and tracking of active and completed courses.
- Integrated protected video playback to restrict screenshots, screen recording, downloads, and screen sharing where supported by the device and platform.
- Designed an intuitive user interface for seamless login and course access.

[01/05/2025 – 28/02/2026]

Pet Guardian — Real-Time Pet Tracking Application Technologies: Flutter, ASP.NET Core, GPS, Geofencing, Global SIM

- Developed a Flutter application for real-time pet location tracking and activity monitoring.
- Integrated GPS, geofencing, and global SIM connectivity for location updates and boundary alerts.
- Integrated ASP.NET Core backend services for live location data and low-latency notifications.

With 7+ years of experience in software development, I strive to turn complex challenges into practical, reliable, and user-focused solutions. I welcome opportunities to collaborate with talented teams, contribute my technical expertise, and build innovative applications that make a meaningful impact.
